

Safety Statement and General Letter of Conformity

February 2, 2009

BE Good Company is dedicated to the safety and integrity of our products. We are committed to offering quality items for children that educate and entertain while meeting or exceeding the highest standards in design and safety. We want all of our partners to know that you can sell our products with the confidence.

All items that have been manufactured on or after November 12, 2008 has a Certificate of Compliance (COC) on file that includes a list of the applicable regulations the item was tested for and the CPSC accredited laboratory that was used for the testing of that item. These documents are available by request electronically.

For the inventory that you may have in stock that was produced before the November 12th, 2008 deadline but after January 1, 2007 please note that COC's are not required. We can however, verify that to the best of our knowledge, our product meets all current CPSIA regulations for lead and phthalate content. If you need specific information on an item, please do not hesitate to contact us directly.

Further, in an effort to better serve you, we are currently planning on making all of our safety testing documentation available via our website. When we go live with this information, we will provide you with the link for your direct accessibility.

We here at BE Good Company will continue to strive to provide you with up-to-date safety information.
