WARNING:

CHOKING HAZARD – Small Parts.
Not for children Under 3 Years.

Note: Adult Supervision Required.

Product is safe and non-toxic but should be used under direct adult supervision.

***You are about to enter the magical world of Grow-It!
instant Pixie Dust!***

This magical Instant Pixie Dust will grow and grow when you add water. It is safe, safe, safe ... but should always be used with adult supervision. Remember this is a water based product. Only play with it in the Pixie Dust tray or another container made to hold water.

The amount of water added to the instant dust will create very different types of dust.

OK, let's get started

— STEP #1 - Making Instant Pixie Dust for the Pixie Playland Tray —

Pour Instant Pixie Dust packet into the tray before adding water. Next, add 16 ounces (2 measuring cups) of water to the Grow-It! Instant Pixie Dust. Watch it grow, grow, grow. Swirl the dust and water together using your rake. In no more than a minute or two the snow will grow and cover the entire bottom of your Pixie Playland Tray.

————— STEP #2 - Play, play, play... —————

Play, play, play with your Instant Pixie Dust, Pixies and toys in the Pixie Playland Tray.

Life of Grow-It! Instant Pixie Dust: This Instant Pixie Dust will not melt but it will eventually dry out. Depending on the humidity and temperature in your play environment, the dust will last anywhere between a few days and a couple of weeks. Just add more water to freshen up the dust. A spray bottle works great!

Also, as the dust dries, it will go through different consistency stages. First it is wet and fluffy. Second, it may start to get~ a little "rubbery". Finally, it will get dry and crunchy. You can add water at any of these stages to reactivate the dust. The dust does not wear out.

Warning: Do not eat or ingest. The powder is made of Sodium Polyacrylate and is safe to handle. If swallowed, rinse mouth and drink a glassful of water or milk. Do not induce vomiting. It may irritate eyes, skin, nasal and respiratory passages. If it gets in the eyes, rinse immediately with water. If on the skin, rinse skin with water when finished using.
